

K'KMARK CLASS VI RESEARCH SCOUT

CONSTRUCTION DATA:

Class -	VI	VI
Model -	Mk I	Mk III
Date Entering Service -	2258	2264
Number Constructed -	8	6
HULL DATA:		
Superstructure Points -	8	8
Damage Chart -	C	C
Size		
Length -	180 m	180 m
Width -	68 m	68 m
Height -	35 m	35 m
Weight -	74,165 mt	76,015 mt
Cargo		
Cargo Units -	90 SCU	90 SCU
Cargo Capacity -	4,500 mt	4,500 mt
Landing Capacity -	None	None
EQUIPMENT DATA:		
Control Computer Type -	L-14	M-1
Transporters -		
Standard 6-person -	1	1
Combat 22-person -	-	-
Emergency 18-person -	2	2
Cargo -	1	1
OTHER DATA:		
Crew -	120	123
Troops -	-	-
Passengers -	20	20
Shuttlecraft -	7	7
ENGINEERING:		
Total Power Units Available -	17	23
Movement Point Ratio -	2/1	2/1
Warp Engine Type -	FWC-1	FWC-2
Number -	1	1
Power Units Available -	14	20
Stress Chart -	N/L	M/K
Max Safe Cruising Speed -	Warp 8	Warp 7
Emergency Speed -	Warp 10	Warp 9
Impulse Engine Type -	FIC-2	FIC-2
Power Units Available -	3	3
WEAPONS AND FIRING DATA:		
Beam Weapon Type -	FH-2	FH-2
Number -	2	2
Firing Arcs -	1 f/p, 1 f/s	1 f/p, 1 f/s
Firing Chart -	H	H
Maximum Power -	3	3
Damage Modifiers		
+3	-	-
+2	-	-
+1	(1-10)	(1-10)
SHIELD DATA:		
Deflector Shield Type -	FSA	FSA
Shield Point Ratio -	1/1	1/1
Maximum Shield Power -	7	7
COMBAT EFFICIENCY:		
D -	33.4	37.4
WDF -	2.6	2.6

NOTES:

Federation Wide Use

These vessels have been named in honor of an early Vulcan scientist and explorer. K'Kmarak vessels carry on in the tradition of their namesakes. All ships in this class are designed for extended stays and therefore have large living quarters and working areas.

The K'Kmarak was developed as a research ship only. It was never intended for combat and only carries its phaser compliment to meet with Star Fleet regulations. No ships in the research or exploration missions are allowed to travel without minimum weapons.

When the Mk I was first commissioned, the need for a research vessel in the rimward areas of the Federation was greatest. As each ship in this class was completed, it was sent to this area to aid in the expansion of the territory. The K'Kmarak was instrumental in mapping this great expanse of space and in establishing contact with heretofore unknown races.

All ships of this type have the most extensive laboratory facilities aboard any Star Fleet scout. They are capable of performing the most intricate of planetary studies and have monitored and recorded several novas.

It was during on of these investigation that a K'Kmarak class vessel, the USS T'Pool (NCC 24307) was engulfed by a stellar explosion that covered 1200 A.U.'s in 20 hours. Luckily for the Vulcans aboard, their ship was caught up in a solar wind of phenomenal proportions and pushed away from the main thrust of the radiation. When all had settled, the T'Pool was still intact and flight worthy. The crew, however, had suffered within a few days. The ship wandered about for several weeks after when the shockwave damaged the navigational sub-systems, until it was discovered by the USS Agnicourt (NCC 4314), a Larson Class destroyer dispatched to locate the T'Pool. The crew were beamed aboard and the T'Pool was left adrift with marker beacons on, warning any approaching vessel to stay away. When ships were dispatched to recover the hulk, it was nowhere to be found and has not been seen or heard of since.

All in all, the K'Kmarak class has served it purpose well and is still in service today. It should be noted that all K'Kmarak class ships are still crewed exclusively by Vulcans.
