## NOTES:

Known Sphere of Operation: Romulan Borders  
 Data Reliability: D  
 Major Data Source: Klingon Sector Intelligence

As large as the L-24 class Battleships, these vessels were commissioned into service prior to the introduction of the L-30 Ber'taa Battleships. These ships use almost all state of the art components in their design and the all new components work well together to create a fearsome fighting platform. It is the intension of the Klingon High Command to operate these ships in pairs with a Ber'taa class Battleship, forming the command squadron of all it's front line fleets. The remining L-24s are expected to be eventually be reclassified as Heavy Battlecruisers and form new heavy strike squadrons along the Romulan boarder. Construction of the D-38 is at the rate of 4 per year using the facilities at Taamar and Gunn Re'.
